

# U-Meter Plus

## with Fixed Bag and Luer-Lock Sampling Port

### Intended use:

**U-Meter Plus** is a mechanical and disposable urine meter which is intended to be used for collection, sampling and measuring urine volume output (diuresis) over time in critically ill patients. The device consists of a urine collection bag directly attached to a measuring device providing a closed collection system. The urine meter is attached to a Foley (bladder) catheter and the urine flows through the catheter to the chamber. The urine meter is designed with two non-return valves (NRVs) which help minimize retrograde infection. Fitted with bottom outlet.

The products are intended for single use only.

### Product range:

REF	Description
158100140190	2L fixed bag with free flow valve, straps& round hook, 110 cm
158100150190	2L fixed bag with free flow valve, straps& round hook, 150 cm

  

Description	Ref
16010021019x	Round hanger
16010031019x	Square hanger

\* Here noted as x, reference codes contain additional digits (1-5) representing a language code.

### Material specifications:

<b>Contains latex?</b>	No
<b>Contains DEHP?</b>	No
<b>U-Meter Plus</b>	Polyvinyl chloride (tubing, valve), Acrylonitrile-butadiene styrene, Styrene-acrylonitrile (chamber), Expanded polytetrafluoroethylene+Non-woven polyester (filter), Low density polyethylene, High density polyethylene (cap), Polyamide (hook), Thermoplastic polyester elastomer (strap), Polypropylene (clamp)
<b>Luer-Lock port</b>	Polycarbonate, Silicone Rubber

### Storage and handling:
